## Project details

Title of project	Low cost production process for race sail dayboat
Keywords	foam / hull / sail / day-boats
Objectives, innovation outcomes	<p>Up to now, boat's hulls are produced pieces by pieces and then assembled. This CRAFT project aims to produce small boats with only one piece of hull, thanks to a polyurethane foam cast in a mould. This new process will allow to reduce cost by 40%, to reduce weight, and increase performance.</p> <p>This project will consist in :</p> <ul style="list-style-type: none"> <li>- testing of the process and the product in long term viability</li> <li>- confirming economic viability</li> <li>- designing and building a process optimized prototype : 10 000 euro 7,50 m/900kg/one class racer production (bg partner/ subcontractor and or licensees)</li> </ul>
